

AMMONIUM PHOSPHATE

Highly effective granular NP fertilizer for open field application. It can be used for basic, pre-planting application and for side-dressing for all crops and soil types. As a component for the preparation of NPK blends.

Ammophos has a positive impact on crop yields and the quality of grown products.

Nitrogen in the ammophos is in ammonium form, which is fixed in the soil and is absorbed by plants almost in full. Contains phosphates in a easily accessible form.

QUALITY CHARACTERISTIC	NP 12:39	NP 10:33	NP 10:36
Appearance	Light gray granules		
N, %	12	10	10
P2O5, %	39	33	36
Humidity, %, max	1.0	1.0	1.0
Granulometry:			
less than 1 mm, %, min	5	5	5
1-4 mm, %, min	92	92	92
less than 6 mm, %	100	100	100
Statical granules strength, MPa, min	3.0	3.0	3.0
Friability, %	100	100	100

The allowed tolerance of the nutrient content is set in accordance with the domestic regulation of the country of import.

PACKING AND STORAGE

The product is packed in 50 kg laminated polypropylene bags with polyethylene liner and 500, 800 and 1000 kg big-bags.

Store in covered storage facilities that exclude penetration of precipitation and ground water.

The product packaged in big bags can be stored in open areas with a hard ground surface and under cover.

The warranty period is 9 months from the date of manufacture under the recommended conditions of transportation and storage.
Shelf life is unlimited.
