

MIXTURE OF AMMONIUM PHOSPHATES GRADE 19:55

The 100% watersoluble mixture is a customized 19:55 grade following clients requirement. This formula may have various applications including as a raw material for the production of watersoluble NPK blends.

QUALITY CHARACTERISTIC

Appearance	White crystals
Total nitrogen N, %	19
P ₂ O ₅ , %	55
Humidity,%, max	0.5
Insolubles,%, max	0.04
pH (1% solution)	7.6 - 8.4
Turbidity, NTU, max	25
Solubility in water at 20 °C, g/1000 cm ³	510
Friability,%	100
Arsenic (As), ppm, max	3
Lead (Pb), ppm, max	4
Fluorine (F), ppm, max	10

The allowed tolerance of the nutrient content is set in accordance with the domestic regulation of the country of import.

PACKING AND STORAGE

The product is packed in 25 kg and 50 lbs laminated polypropylene bags with polyethylene liner and in 1000, 1200 and 1250 kg big-bags.

Store in covered storage facilities which exclude penetration of precipitations and ground water.

Warranty period is 1 year from the manufacturing date under recommended conditions of transportation and storage.

Shelf life is unlimited.
